LIST OF CONTENTS

NUMBER 1

CTAC-89

W. L. Hogarth	v	Preface
M. D. Stevenson, M. Kagan and **W. V. Pinczewski**	1	Computational methods in petroleum reservoir simulation
Ingolf Teipel and **Alexander Wiedermann**	21	A three-dimensional Euler code for calculating flow fields in centrifugal compressor diffusers
Shigeru Murata, Nobuyuki Satofuka and **Tadashi Kushiyama**	33	Parabolic multi-grid method for incompressible viscous flows using a group explicit relaxation scheme
Z. Zhu and **C. A. J. Fletcher**	43	A study of sequential solutions for the reduced/complete Navier–Stokes equations with multigrid acceleration
C. A. J. Fletcher and **J. G. Bain**	61	An approximate factorisation explicit method for CFD
M. W. Stevens and **B. J. Noye**	75	Wave propagation analysis for finite difference solutions of the three-dimensional tidal equations
H. S. Pordal, P. K. Khosla and **S. G. Rubin**	93	Inviscid steady/unsteady flow calculations
B. J. Noye	119	Some three-level finite difference methods for simulating advection in fluids
B. P. Leonard and **H. S. Niknafs**	141	Sharp monotonic resolution of discontinuities without clipping of narrow extrema
	I	*Announcements*
	III	*Software Survey Section* TRIDENT; N3S; ESTET; ULYSSE; ETC3D; WTSL$^+$

NUMBER 2

J. Li, A. Chambarel, M. Donneaud and **R. Martin**	155	Numerical study of laminar flow past one and two circular cylinders
Rémi Abgrall	171	An extension of Roe's upwind scheme to algebraic equilibrium real gas models
Jean Piquet and **Michel Visonneau**	183	Computation of the flow past shiplike hulls
T. Tang and **D. B. Ingham**	217	On steady flow past a rotating circular cylinder at Reynolds numbers 60 and 100

Charles-Henri Bruneau 231 Computation of hypersonic flows round a blunt body

I *Announcements*

III *Software Survey Section*

NUMBER 3/4

THIRD INTERNATIONAL SYMPOSIUM ON COMPUTATIONAL FLUID DYNAMICS—NAGOYA

Koichi Oshima 243 Preface. Summarizing report of the *3rd ISCFD—Nagoya*

Itaru Hataue 251 Computational study of the transonic flow around a rocket-shaped body

Kazuhiro Nakahashi and **Kouichi Egami** 273 An automatic Euler solver using the unstructured upwind method

Nobuyuki Taniguchi and **Toshio Kobayashi** 287 Finite volume method on the unstructured grid system

D. Q. Xu, H. Honma and **T. Abe** 297 A numerical method for a kinetic equation and its application to propagating shock waves

Koji Morinishi and **Nobuyuki Satofuka** 305 Convergence acceleration of the rational Runge–Kutta scheme for the Euler and Navier–Stokes equations

Kojiro Suzuki 315 Topology of a computed incompressible three-dimensional separated flow field around a high-angle-of-attack cone–cylinder

Youhei Morinishi and **Toshio Kobayashi** 335 Large eddy simulation of complex flow fields

Nam-Hyo Cho and **C. A. J. Fletcher** 347 Computation of turbulent conical diffuser flows using a non-orthogonal grid system

Mehmet Ş. Kavsaoğlu, Ünver Kaỳnak and **William R. Van Dalsem** 363 Three-dimensional application of the Johnson–King turbulence model for a boundary-layer direct method

Yo Mizuta 377 Generalized boundary conditions on the basis of a deformable-cell method: free surfaces, density interfaces and open boundaries

Yasunari Takano 387 Simulations of bifurcation processes of reflected-shock waves in ionizing argon in a shock tube

Susumu Takanashi 393 A simple algorithm for structured-grid generation with application to efficient Navier–Stokes computation

Toshio Miyauchi, Koichiro Kawano and **Miki Shingou** 401 The coherent structure in turbulent mixing layers (structure in the core and rib regions)

Hiroshi Tokunaga, Kenichi Ichinose and **Nobuyuki Satofuka** 413 Numerical simulation of transient turbulent flows by the vorticity–vector potential formulation

Takashi Yabe, Takayuki Aoki, Gyo Sakaguchi, Pei-Yuan Wang and **Takeo Ishikawa**	421	The compact CIP (cubic-interpolated pseudo-particle) method as a general hyperbolic solver
Yoshifumi Ogami and **Teruaki Akamatsu**	433	Viscous flow simulation using the discrete vortex model—the diffusion velocity method
M. Murakami and **K. Iwashita**	443	Numerical computation of a thermal shock wave in He II
Hideji Nishikawa, Yoichiro Matsumoto and **Hideo Ohashi**	453	Numerical calculation of the bubbly two-phase flow around an airfoil
S. Yamamoto and **H. Daiguji**	461	A numerical method for the transonic cascade flow problem
T. Ikohagi and **B. R. Shin**	479	Finite-difference schemes for steady incompressible Navier–Stokes equations in general curvilinear coordinates
M. Napolitano and **G. Pascazio**	489	A numerical method for the vorticity–velocity Navier–Stokes equations in two and three dimensions
Yu. P. Golovachov	497	Flow about a spherically blunted body in a supersonic wake
	I	*Announcements*
	III	*Software Survey Section*

AUTHOR INDEX

Abe T., 297
Abgrall R., 171
Akamatsu T., 433
